A Message from Principal Desk...

It gives me immense pleasure to observe this year (2015-2016) as our Golden Jubilee year of the college. The golden fluorescences have given me an extra energy to work for the development of the institution. Now, we have come to the end of this glorious year with a two day long programme on 1st and 2nd July, 2016. I have a vision to use modern technology in teaching and learning process in place of old ways of knowledge to the students of this rural area. We cannot expect to function effectively until and unless the mindsets of the teaching community as well as the students have to be changed to stop using the same old ways of pedagogy. At this moment, I have noticed a cultural assimilation and co-operation among the different ethnic group of students residing in this locality. This will bring a better understanding among the students. At last, I hope the changes brought in the wake of this golden jubilee will be a base for future development of this institution.
